# Inno vation

# **CTCK120**

The wear resistant all-rounder for cast iron machining

## Application - customer benefits

### Industries Typical components □ Brake disk Automotive Mechanical engineering □ Brake drum Power generation □ Turbocharger housing Railway vehicles □ Flywheel □ Bearing case **Materials** ☐ Grey cast iron with lamellar graphite (GJL/GG) □ Vermicular cast iron / compacted graphite iron (GJV/GGV/CGI) ☐ Spheroidal graphite cast iron (GJS/GGG/SGI) ☐ Austempered ductile iron (ADI)

## Product advantages Your benefits Optimized coating adhesion High process security combined with consistent quality of the work piece surface High wear resistance High cutting parameters also with interrupted cut Suitable for roughing and finishing High toughness Process security also with interrupted cut Universal application For all cast iron materials - roughing and finishing Consistent results Fixed tool change intervals can be close to the limit of tool life Wide standard program The correct insert for every operation available in stock

## Product characteristics - application examples

# **Cutting materials**

- Coating thickness 16 μm
- ☐ Al<sub>2</sub>O<sub>2</sub>-based coating
- □ CVD coating

#### **CTCK120**

#### **Brake disk**

Cutting data:  $v_c = 450 \text{m/min}$   $a_p = 2-2.5 \text{mm}$  f = 0.4 mm

Material: GG-25; rough turning of brake disk

**CERATIZIT:** 

Tool life: 95 parts

Competitor/benchmark

Tool life: 60 parts

#### Result:

#### **Turbocharger housing**

Cutting data:  $v_c = 140 \text{m/min}$  $a_p = 2.5 \text{ mm}$ 

 $f' = 0.3 \, \text{mm}$ 

Material: GGG-60; rough turning of housing surface

**CERATIZIT:** 

Tool life: 60 parts

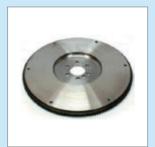

Competitor/benchmark:

Tool life: 45 parts

Result:

#### **Flywheel**

Cutting data:  $v_c = 280 \text{m/min}$   $a_p = 2 \text{ mm}$  f = 0.5 mm

Material: GGG-50; rough turning of contact faces

**CERATIZIT:** 

Tool life: 18 parts

Competitor/benchmark:

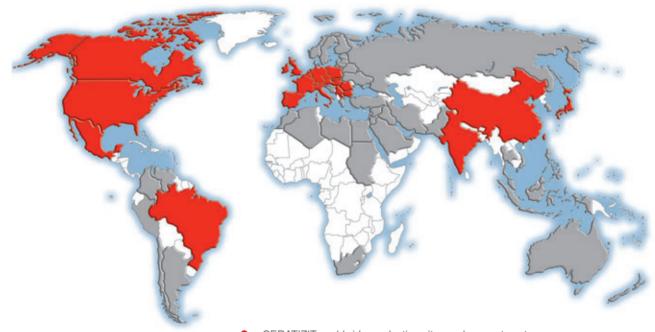

**Tool life:** 15 parts

Result:
